Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/562,271	Applicant(s) STOEFFLER ET AL.	
	Examiner Randall Chin	Art Unit 3723	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. At the outset, upon further consideration, the Finality of the Office Action mailed 15 July 2010 is hereby withdrawn and action upon claims 1-12 now follows.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In claim 1, lines 4-5, the limitation that the bristle unit moves in an “oscillating” manner is not originally supported and therefore constitutes new matter.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Lamond et al. 5,875,510 (hereinafter Lamond).

As for claim 12, the patent to Lamond discloses a toothbrush in Figs. 1-9 comprising a brushhead assembly 2 which includes an attachment system at body portion 12, a handle 4 to which the brushhead assembly 2 is removably attachable, the handle 4 having a fixed receiving portion with a cavity or hollow part 24 or even at hollow center 36 of collar 32 (Figs. 7-9; col. 3, lines 54-65), at an upper end thereof, into which a lower portion of the attachment system fits, wherein the brushhead assembly 2 includes a first part which could be nib 46 which mates with a first part at slot 48 9fig. 8) on the hollow portion of the fixed receiving portion to prevent rotational movement of the brushhead assembly relative to the handle (col. 4, lines 3-5) and a second, separate part at wing 14 and front edge 49 or at pin 44 which mates with a second, separate part at surface 50 or at aperture(s) 28 (Figs. 2, 3 and 9; col. 4, lines 5-7) of the receiving portion to positively prevent translational movement of the brushhead assembly relative to the handle, wherein the attachment system is configured and arranged to permit the brushhead assembly to be removed from the handle or inserted into the handle linearly, without rotation of the brushhead assembly relative to the handle (col. 4, lines 7-12). As for the preamble reciting "[A] **power** toothbrush", no patentable weight has been given to such term "power" here absent any further structure or specificity in the claim.

Allowable Subject Matter

6. Claims 10 and 11 are allowed.

Art Unit: 3723

Claims 1-9 would be allowable if rewritten or amended to overcome the rejection under 35 U.S.C. 112, 1st paragraph, set forth in this Office action.

Conclusion

7. Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Randall Chin whose telephone number is (571) 272-1270. The examiner can normally be reached on Monday through Thursday and every other Friday.
